

Contents

▶ Unit Overview	5
1. Investigate Current Resource Usage Practices	
1.1 Identify Environmental Regulations	8
1.2 Assessing Compliance with Environmental/Sustainability Regulations	10
1.3 Provide Information on Environmental and Resource Efficiency Systems	11
1.4 Measure and Document Current Resource Usage	12
1.5 Analyse and Document Current Purchasing Strategies	14
1.6 Analyse Current Work Processes to Identify Areas for Improvement	15
2. Set Targets for Improvements	
2.1 Seek Input and Information from Stakeholders, Key Staff and Specialists	20
2.2 Evaluate Alternative Solutions to Workplace Environmental Issues	22
2.3 Set Efficiency Targets	24
3. Implement Performance Improvement Strategies	
3.1 Source and Use Appropriate Techniques and Tools to Help Achieve Efficiency Targets	28
3.2 Apply Continuous Improvement Strategies to Own Work Area of Responsibility	30
3.3 Implement and Integrate Environmental and Resource Efficiency Improvement Plans	31
3.4 Supervise and Support Team Members to Identify Areas for Improved Practices and Resource Efficiency	32
3.5 Seek Suggestions about Environmental and Resource Efficiency Management from Stakeholders	33
3.6 Implement Costing Strategies to Fully Utilise Environmental Assets	34
4. Monitor performance	
4.1 Use and/or Develop Evaluation and Monitoring Tools	38
4.2 Report on Efficiency Targets to Key Stakeholders	38
4.3 Evaluate Strategies and Improvement Plans	40
4.4 Set New Efficiency Targets and Apply New Tools and Strategies	41
4.5 Promote Successful Strategies and Reward Participants	42
▶ Review Project	45
