

Contents

1.0 Using computers in the workplace

- 1.1 Office equipment x
- 1.2 Data storage x
- 1.3 Safe work strategies x
- 1.4 Microsoft Excel x

2.0 Create spreadsheets

- 2.1 Plan spreadsheet design x
- 2.2 Spreadsheet information requirements x
- 2.3 Spreadsheet style and layout requirements x
- 2.4 Style sheets and automatic functions x

3.0 Use spreadsheets

- 3.1 Enter, check and amend data x
- 3.2 Format spreadsheet using software functions to adjust page and cell layout to meet information requirements, in accordance with organisational style and presentation requirements x
- 3.3 Test formulas to confirm output x
- 3.4 Overcome problems with spreadsheet design and production x
- 3.5 Complex formulas x
- 3.6 Data analysis add-ins for Excel x
- 3.7 Time series analysis and forecasting in Excel x

4.0 Automate and standardise spreadsheet operation

- 4.1 Evaluate tasks appropriate for automation x
- 4.2 Create, use and edit macros x

5.0 Develop a linked spreadsheet solution

- 5.1 Utilise spreadsheet to meet requirements x
- 5.2 Link spreadsheets x
- 5.3 Format cells and use data attributes x
- 5.4 Test formulas x

6.0 Produce charts

- 6.1 Select appropriate chart type and design x
- 6.2 Create charts using appropriate data ranges x
- 6.3 Modify chart type and layout x

7.0 Finalise spreadsheets

- 7.1 Preview, adjust and print spreadsheet charts x
- 7.2 Data inputs x
- 7.3 Store spreadsheet without data loss/damage x
